Lower than normal precipitation and higher than normal temperatures since 2011 have added up to a multi-year drought. City of Fort Worth, our water supplier, has notified us that since water reserves have dropped, Stage 1 of the Drought Plan will take effect on Monday, June 3.

Stage 1 includes restrictions that prohibit non-essential water uses like hosing paved areas and buildings, with certain exceptions. Allowing water runoff or other waste, including failure to fix a leak or broken sprinkler head, is also prohibited. Vehicle washing is limited to the use of a hand-held bucket or hose equipped with a positive pressure shutoff nozzle, or at a commercial car wash.

During Stage 1 customers may water with sprinklers or irrigation systems twice per week.

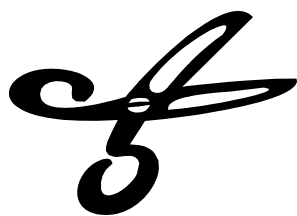

- Residential addresses ending in even numbers may water on Wednesday and Saturday.
- Those ending in odd numbers may water on Thursday and Sunday.

- All non-residential locations may water on Tuesday and Friday.
- No watering is permitted on Monday.

Customers may water foundations and newly installed shrubs and trees for up to two hours on any day using a handheld hose, soaker hose or drip irrigation system. Establishing new turf is discouraged, but if hydro mulch, grass sod, or grass seed is installed to establish a new lawn, there are no restrictions for the first 30 days.

All customers are encouraged to use native and drought tolerant plants in landscaping, and to reduce the frequency of draining and refilling swimming pools.

The complete Water Management and Drought Contingency Plan is available on our website at [www.tcmud.org](http://www.tcmud.org). Contact us at [info@tcmud.org](mailto:info@tcmud.org) or (682) 831-4600 for more information.
