

July 1, 2014

TCMUD1's New Water and Sewer Rates, as of July 1, 2014, Compared Against Twenty DFW Municipalities with Populations Less Than 10,000 People.

Note 1: *Trophy Club's current population is 10,800 people. This is spread sheet #2 of four and compares TCMUD1's "average cost" for water and sewer against 20 municipalities in the DFW Metroplex with populations under 10,000 people.*

Note 2: *Spread sheet #1, plus a Summary Sheet, comparing TCMUD1's cost against five close-by municipalities is also available at <http://www.tcmud.org/public-informatio/news/> for viewing.*

Note 3: *The cost for a 5/8" meter, or 3/4" meter if a municipality did not have 5/8" meters, was compared; plus the cost of a 1" meter was compared. In several instances, the costs are identical for all sizes of meters. In these situations, the same costs are reflected in both sets of calculations (5/8" or 3/4" meters, and 1" meters).*

Note 4: *Trophy Club's average residential water usage in the past has been 18,500 gallons / month, but has slightly risen to 19,000 gallons with the addition of so many new larger homes in the past few years. With the new rates effective July 1, 2014, sewer usage is now capped at 18,000 gallons. All calculations are based on comparing TCMUD1's new July 1, 2014 water and sewer rates to those of surrounding municipalities. Our average of 19,000 gallons of water was used in all calculations; but our average sewer charge of 18,000 gallons is compared to the "average" sewer usage and charge that each municipality has reported. This was done to try and put all comparisons on the same basis.*

	<u>5/8" or 3/4" Meter Rates</u>	<u>1" Meter Rates</u>
TCMUD1	\$130.31	\$134.31
Argyle	\$141.26	\$181.83
